COMPUTER SCIENCE UNDERGRADUATE

ABOUT ME

Aspiring and passionate B.Tech Computer Science (Data Science) student with a strong foundation in backend development and API integration. Seeking an internship opportunity to apply and grow my problem-solving, programming, and data-handling skills in real-world scenarios.

EDUCATION

B.Tech in Computer Science (Data Science)

UKF College of Engineering and Technology, Paripally, Kollam

2023 – 2027 (Currently in 2nd Year, Semester 3)

PROJECTS

● Terminal Music Player

A personal web music player project created during my 10th-grade year.
website preview [Terminal Music Player](#)

● Vengelab – Venge.io Game Guide

A collaborative project with an international teammates.
Built backend APIs for user authentication and community linking
website preview [VengeLAB](#)

● Apex Roleplay (GTA SAMP Server)

Short-term backend contributor to private multiplayer roleplay server
Worked with C-based Pawn scripting for game server logic
[website apex roleplay](#)

● Alpha Music (Under Development)

Currently freelancing in a collaborative non-commercial project.
Developing backend APIs for user registration and group chat features
[website Alpha music](#)

SKILLS

Languages: Python, JavaScript, C

Tools: Git, Vercel

INTERESTS

- Backend and API development
- Data Science and problem-solving
- Real-world tech applications and automation
